Security system expansion expected

By JANA MOON

According to Vice President of Student Affairs, Bascom Woodward, the University is expanding its security system, especially around the women's dormitories.

The university will hire one night supervisor who has considerable experience and two new patrolmen. They will bring the force from one chief and eight patrolmen to one chief, a night supervisor and ten patrolmen. The campus will be divided into three areas with at least three patrolmen on duty at all times. Vice President Woodward also says that more lighting will be installed on campus, especially around the women's dormitories.

Woodward adds, "If young men are caught in the women's dormitories after visiting hours, they will be arrested for trespassing."

Woodward concludes in saying, "We're concerned about bettering security on this campus and will accept any input from students."

Drop and add is no longer a crisis

By KAYE DICKIE

Dropping and adding classes has been traumatic for students in the past. However, thanks to modern technology and the constructive thinking of the JSU administration, dropping and adding classes has taken on a new look for Fall 1979.

The new drop-add system is replacing the business office's long lines by eliminating that step completely.

Now, the first step for students is visiting the Office of Admissions (ground floor of Bibb Graves) with the class and section wanted in mind. At the Office of Admissions, the student is given an official drop-add form after presenting his student ID card.

First phase of lunar eclipse (Photo by John P. Beale)

Get involved in CEC!

Just recently it has come to the attention of Dr. Frith and others, namely the other faculty members and the CEC officers, that most of the students majoring in Special Education are not involved in the CEC! We need your help to make our plans come true. Which brings me to the point of our future plans, which include the yearly Christmas party for the many retarded experiences for all those in CEC.

Perhaps also of interest to you are the names of the CEC officers for this year:

The Council for Exceptional Children sets its aims to:

- 1) Allow those in their field to get to know others in that same field.

SGA discusses security laws

By JANA MOON

In the Student Government Association (SGA) meeting Monday, Sept. 10, the Senate passed a motion banning all bottles and eggs from the yearly Rat Run and another motion asking for placement of more security guards on foot around the women's dormitories from dusk to the first class period.

Gus Pantazias, president, discussed the problems with Rat Run saying, "that it got way out of hand with cars being ruined by eggs, rocks, bottles and cans being throw. If it happens again, the administration will cancel Rat Run."

The SGA also called for stricter security laws with more police on foot around the women's dormitories from dusk to the first class period and on weekend hours as designated by university officials.

Other action included the announcement of a new vending contract with B. W. Dalton. The SGA will receive a 52.5 per cent commission. Dalton is presently installing 55 machines that will have security alarms installed to stop vandalism. The date for Average White Band has been changed to early in November and, the deadline for report of active clubs and their officers will be Oct. 30. If the SGA does not receive this information by that date, the club's charter will be revoked.

Faculty scholars to improve JSU's scholastic excellence

By N. KARLOVICH-SMITH

JSU's 41 "Faculty Scholars" will be meeting in the next few weeks to determine and implement their goals as a new student majoring in yet, but JSU is fun. Chemistry is my biggest challenge so far. I would like to be involved in an organization of Faculty Scholar activities."

and section waited in line. In the case of numbers, the student is given an official drop-add form after presenting his student ID card.

A faculty member at the Office of Admissions pulls the IBM card from the section desired, and it is then the student's responsibility to complete the drop-add form, have it initialed, and have it processed at a computer terminal.

Should a student want to add a class and the section he wants has closed, a student may still add that class by seeing that instructor and having his form initialed if the instructor will accept another student. If so, the student then follows the same procedures he would have if he had been given an IBM card.

Computer terminals are expensive, but officials at the academic advisement office say that the convenience much outweighs the expensiveness.

"Long lines can be traumatic," said Bill Meehan, director of academic advisement, "so we feel that the new drop-add system will be beneficial to students as well as minimizing confusion."

Four computer terminals are available on campus: College of Commerce and Business Administration, Dean Shuford's office, Merrill Building; College of Science and Mathematics, Dean Booser's office, Pannell Hall; College of Criminal Justice, Dean Barker's office, Brewer Hall; and the Nursing Department. Two additional terminals for the College of Humanities and Social Sciences and the College of Music and Fine Arts are on order.

Last day for dropping courses without academic penalty is Friday, October 5. A course may be dropped after October 5 until November 15 only if the student is certified passing by the instructor. If the student is failing at that time, his records will show a failing grade.

If he is passing, no grade will be recorded. No course may be dropped after November 15, 1979. September 5 was the last day to add a class for the 1979 Fall Semester at JSU.

CEC officers, that most of the students majoring in Special Education (or for that matter, anyone majoring in Education with an interest in "special" children) do not know of the most important organization to be involved if they plan on a career in Special Education. I refer to, of course, the Council for Exceptional Children (CEC).

to get to know others in that same field.

2) Provide Special Education and Education majors the opportunity to work directly with special children.

3) Provide services for these children.

The CEC motto for this year is Get Off Your Apathy. And this is exactly what we hope to see. Get involved in

include the yearly Christmas party for the many retarded children around our area

(keep in mind that without us and CEC those children would not be having a Merry

Christmas) also being tossed around are several ideas for raising money, one of which is the \$1.98 beauty contest. These things we hope will be both enjoyable and learning

you are the names of the CEC officers for this year, they are:

Rusty Madison, president; John Zauner, vice president; Gola Blackman, treasurer; Nancy Stanfield, secretary; Hope Pritt, membership chairman, and yours truly, the author of this newsletter, Donna Greene-CEC Newsletter Editor and Publicity.

determine and implement their goals as a new student group. The 19 freshmen men and 22 freshmen women selected to receive full one-year scholarships as a result of high ACT or SAT scores, excellent high school records, and outstanding recommendations, must maintain a 2.6 GPA with other academic excellence for the first and each consecutive year in order for the scholarship to be renewed.

organization of Faculty Scholar activities."

Paula Angelette, 18, Jacksonville resident, said, "Math is my major. I'm thinking about teaching at the high school level. An organization of Faculty Scholars would be a challenge. We have advisors assigned to us whom we check with each month. I have to get 2Bs and 3As to maintain a 2.6 GPA."

Representatives of each of the nine academic colleges who are members of the Faculty Scholarship Committee for the 1979-80 academic year include Dr. Mary McMillan, English; Ms. Cathy Motring, Nursing; Dr. Bill Loftin, Business; Mr. John Merriman, Music; Dr. Cole Benton, Biology; Dr. Stephen Bitgood, Psychology; Dr. Daniel Hollis, History; Mr. Robert MacRae, Physics; Dr. Ralph Parnell, Education; Dr. William Reid, Physics; Dr. John Van Cleave, Math; Dr. Jerry Wilson, Psychology; and Dr. Shelby Starling, Law Enforcement.

According to Dr. R. Earl Poore, chairman of the Committee of Faculty Scholars, several of the freshmen students are already pursuing majors in pre-professional programs such as medicine, dentistry and engineering.

Dr. Poore said that monthly Faculty Scholar meetings with debates, guest speakers, and research presentations were distinct possibilities for academic enrichment.

David Pace, undeclared major, Oxford resident, said, "I'm not sure what I'm

In SGA action

Inflation hits Jax State

By JERRY HARRIS

Entertainment and inflation are major concerns of the 1979-80 Student Government Association at Jacksonville State University, according to SGA President Gus Pantazis.

"College students being hit by inflation want to make sure they are getting their money's worth academic-wise and service-wise. The

SGA will try to take the pressure off problems like the gasoline crunch," Pantazis said.

SGA senators may explore such long-range goals this year as providing bus transportation on campus and providing a bicycle rental service. Pantazis said "the idea is to make JSU students less dependent on automobiles."

"JSU is a very car-

oriented campus," he said. "Students use their cars to get to class and go to home on weekends. Some sort of tram or trolley system would help get students to class without cars. Weekend entertainment such as concerts might entice students to stay on campus."

Pantazis, a senior and native of Birmingham, pointed out that all three SGA officers this year are political science majors, "which may indicate a new trend in student government at JSU."

Serving with Pantazis are Tom Young of Lineville, a junior, and Deborah Kay of Anniston, also a junior.

"Many past SGA officers have been business majors, but now it seems that political science students are getting more involved in campus issues," Pantazis said.

"Inflation has hit concerts more than any other entertainment market," Pantazis said. "A top-rated group will cost \$20,000, with another \$10,000 needed for production costs, lights and security."

"What we hope to do is stage smaller shows, costing about \$10,000, consisting of popular groups but not big names. We think students would rather have several good performances rather than one or two big concerts."

The entertainment committee will attempt to book groups scheduling major tours of the southeast rather than pay extra to "bring in a more expensive show from California, which

would cost an arm and a leg," Pantazis said.

The SGA has a schedule of top-rated movies, including many recent releases, due to the efforts of an all-volunteer staff headed by Dr. Steven Whitton, an English instructor.

No specific goals have been made regarding guest speakers. Pantazis said, "There is a definite decline in the popularity of speakers," which he attributes to a lack of interest in political issues.

SGA senators will also be exchanging ideas concerning student services. Students want more washing machines and dryers, more vending machines in dormitories and a student telephone directory. SGA officials also feel there is a need for a "student union information center."

Tentative plans are being made for a boxing tournament to be held on campus during the spring semester. A typewriter service may become available this year for students who need to type term papers and other school related work.

"The SGA wants all projects to be money-makers. We want the projects we tackle to be self-sufficient so we won't have to request so much money from the administration," Pantazis said.

He said the SGA's \$50,000 general fund will be especially well-managed this year. The SGA has instituted new purchasing procedures which include comparison shopping for equipment and

Follow basic safety rules

By JANA MOON

I am glad that university officials have decided to increase security and lighting around the women's dormitories. Now, maybe we can breathe a little bit easier. But don't get over confident. No matter how good the university's security is, danger for personal safety will always exist. So follow basic safety rules and take care of yourself.

The administration wants feedback from you, so help them make your campus a safer place. A good idea would be to add new locks on all the doors in the dormitories because too many people have pass keys. The combination lock numbers need to be changed and the girls

need to keep the lock numbers to themselves. If the new combinations become common knowledge, they need to be done away with and then, the policemen would have to come around to the different dormitories and let the girls in after closing hours. It would be very inconvenient on both sides. Girls also need to quit propping doors open all night. Anyone can come in.

Men need to be very careful about being in women's dormitories after hours. The administration means business about arresting trespassers, so be careful.

It is very depressing that students have to be locked up and guarded for their own safety.

Nothing out-powers JSU's Homecoming

By CHUCK AVERY

Even though homecoming is still several weeks away, many people are hard at work preparing for the annual event.

Why not use our homecoming as an opportunity to set an example for the alumni and the community and help conserve energy at the same time. This was done by a

large northern university last year for their homecoming by powering the floats in the parade with some other form beside gas burning vehicles.

There are several other means of transportation that could be considered. Of course you have the old standard of the horse and buggy. Some may even use

the idea of the dog sled or more conventional means as the bicycle. Roller skates and skate boards are even another form of modern transportation.

There is no limit to what the imagination could come up with but we have a few ideas of our own that could also be used. Why not power a float with pledges on po-go

sticks. Little sisters could be rolled around in baby buggies. Someone should have a rabbit powered float in the parade. Has anyone thought of a sailboat float?

See what we mean. Why use gas if we don't have to? The Chanticleer's theme suggestion is, "NOTHING out-powers a JSU Homecoming."

Eddytorial

By MIKE MOON

A few days ago, I was reading an article which stated that medical authorities claimed that a child born today could expect to live to be 150 years old.

Of course, such a child would have to strictly follow the modern health concepts that prohibit smoking, drinking, overeating, and also promote exercise, health foods, and clean living in general.

Unfortunately there is a catch. Of those 150 years, the child will spend over half of that time old. All those great health practices will extend your life, but they cannot greatly slow down the aging process. So all that child really has to look forward to is spending 75 years in a nursing home or somewhere similar.

Personally, if that is what is to be gained by taking care of yourself, they can keep it. Of course, that article could have been full of it, too. I don't really know or care to.

This Bird's View

By
MAURICE
BOWLES

There is something else about this health kick our nation is on that I want to beef about. No, take that back, there's a whole bunch of that stuff I want to beef about.

Number one is big brother, or Uncle Sam, or the Feds, or whatever they are being called this week. Now, personally, I feel that since I passed the magic age of 21 some time back and have become engaged in the blissful state of wedlock, I am a big enough boy to decide whether something is good for me or not, without being told so by the government. The bureaucrats in Washington, though, don't seem to agree.

They have taken it upon themselves to protect me from my own self-destructive impulses. Not only have they put warning labels on some products. They, in their infinite wisdom, have decided to ban some other products all (See EDDYTORTIAL, Page 9)

Letters to the editor

(All letters to the editor will be printed as long as they are not libelous and as long as they are signed. You may request that your "name be withheld" and it will not appear in print in the paper, but we must have your signature. If you wish the editor, staff member or public to reply, please request and we will do all we can to see that you have your answer.)

For the last two weeks many of the letters to the editor have contained questions about something on campus that had the writers confused or bothered. It is not standard newspaper practice to answer letters to the editor, (it is more common for magazines), however recognizing that many students who write want and need a response to their letters and further recognizing the difference in the needs of the college community as opposed to those of the average community, the editorial staff has decided to respond to those letters which ask questions or those which otherwise may deserve a response.

Anyone who has written in the past wanting such a response please feel free to write again, but if you want help in your love life, try Dear Abby.

Parking & red tape

Dear Editor,

I was surprised to find how friendly the people really are here at JSU. My first week as a freshman was hectic, and I was homesick until I met so many people. Whenever I lost my sense of direction, I was never hesitant to ask, because everyone seems to want to render their help.

The only complaint I have is that there aren't enough student parking spaces in front of the dormitories. It is

enough of us complain something will be done about the situation. Please think about this problem and hopefully someone can come up with a solution.

Name Withheld

★ You must be a freshman. That's all I have heard since I came to this campus.

++++

I am only a freshman and have been here only three weeks. Since I have been here both my brother and I

beauractic red tape and if you can find a solution there re about a hundred million taxpayers who would love to hear it.

+++

I like Jacksonville State's campus and where it is located. But, Jacksonville also has a very hard and good teaching staff which means more studying. So, I would like to say that the library is the only quiet place to study, and the problem is that it closes at 10 when it needs to stay open until 11.

Dale Norwood

★ Good idea!

++++

Dear Sir,

I would like to call your attention to the ridiculous process of registration. I realize this is college, not high school, but the fact is, there has to be an easier way. I changed my schedule three times and still didn't get my classes. Nothing is more frustrating than being told a class is closed when the rest of your schedule works out.

I understand that we are going to have to use a

paying for my food and books and social expenses I cannot afford the prices of JSU over priced books.

I as well as everyone else am fighting the war of inflation and the people who run JSU's bookstore add to the problem. I don't believe in taking financial aid because I believe it is for the less fortunate (that is less fortunate than I). To finish school might be impossible without financial aid but until I can't afford it I won't apply for it.

I feel that JSU's bookstore should lower prices of the books in the interest of students, principle glutanty and inflation.

Peter Cowant

I've heard thousands of time over the radio, "The SGA wants you to become involved." I really don't understand why they think people are going to be so ready "Johnny on the spot" fired up to become involved in SGA.

I would or should emphasize the freshman class. They have been confronted by the SGA only once at orientation sessions in which

By MAURICE BOWLES

After fighting the dormitory battle for three years, it was with great pride and excitement that my roommate and I reserved an apartment for this fall.

The summer months passed by quickly with the knowledge that we would no longer have to put up with drunk freshmen, 60 decibel stereos and a constant toilet paper shortage. It would be great, we thought, two bachelors living the free life: learning to cook, entertaining girls, and having small parties.

We have, however, encountered a few problems. The sheets I bought for my bed are too short, so I have eighteen inches of mattress showing from underneath my pillow. Other than that, and the fact that we somehow wound up with pink butterfly kitchen curtains hanging in our bedroom, everything looks pretty good.

Our next task, filling the cabinet with groceries, was

also an enlightening experience. Our wallets were enlightened to the fact that buying groceries would cause them severe weight loss.

Once we got moved in and settled, everyday life has provided us with several obstacles that we are destined to overcome some day.

For instance, how was I to know that you were supposed to put butter in an iron skillet before you fry an egg? And we have yet to successfully bake a Betty Crocker cake. I don't understand why, because we check it every ten minutes or so to make sure it's rising.

It took us three mornings to learn that if you put hot water in a coffee percolator, it will have all the wake up power of Happy Times Lemonade.

We found that necessities such as mayonnaise, salt and pepper shakers, paper towels and toilet paper don't just appear in their respective places. They have to be bought and shared

equally. So how do you split toilet paper down the middle to insure that each roommate gets his fair share?

We are having an awful time washing clothes. Everytime I come back from the washateria, I have one more queer sock with no mate. Last week I was in a hurry and dried everything on "extra hot." Now my permanent press shirts look like a relief map of the Smoky Mountains.

My roommate got laughed at in the coliseum the other day because all the guys thought he had pink underwear. It was really white

underwear that had been washed with his bright red "Fighting Gamecock" jersey.

All of our problems were quickly forgotten last week when my roommate told me that a classmate of the female gender would be coming over that evening.

We made the usual immaculate clean up job, except for the week-old dishes, and I made myself scarce. As I left my excited partner, I wondered what the evening would have in store for him. "He ought to at least get his

(See BIRD, Page 6)

student parking spaces in front of the dormitories. It is bad to have to walk blocks to the dorms, carrying all the clothes that were taken home to Mom to wash.

Julie Williams

++++

Mrs. Jana Moon,

I am writing to complain about the parking situation. It seems ridiculous to get parking tickets when there are no other parking spaces available. Especially when you are a girl and forced to walk alone in the night with the chance of getting raped or mugged just because there are no parking spaces available.

I know this is an age old problem but hopefully, if

weeks. Since I have been here both my brother and I have been told to go pick up checks three different times at the business office. All three times we have been told to come back later.

Since I am only a freshman, I expect a few difficulties. But my brother is a junior and he still gets the run around. I am sure that we are not the only ones getting this run around. So why isn't something done about it?

James Vaughn

*The problem you and every other student runs into at the business office, admission and every where else is properly termed

I understand that we are going to have to use a computer next semester. If this doesn't work, I suggest some form of pre-registration. It's too important a thing to mess up.

Sincerely,

Pat Forrester
++++

I would like to say a few words about the outrageous prices of books in the JSU bookstore. The prices of the book stores are consistently higher than those even of Boozer's book store which is a profitable business.

I myself cannot afford to pay the high prices of books every semester and I think the JSU bookstore is a rip-off. Being a freshman and

orientation sessions in which most speeches seemed to leave you sitting in your chair yawning.

It is time the SGA tried to overcome the students with several activities at the beginning of the year, but that has past and the only time you are confronted by the SGA now is when they get their free spot on the radio. When will things really get moving?

Right of center

Gene
Wisdom

By GENE WISDOM

The central problem of the SALT II Treaty is our ability to verify Soviet compliance with the provisions of the agreement. The American ability to observe production, testing and deployment of the weapons systems covered by the treaty rests primarily on spy satellites, radar installations near the Soviet border, and airborne radar. Both sides agreed not to hide their missiles or interfere with each other's surveillance devices.

This might sound agreeable if it could work but it won't. The United States cannot adequately verify Russian's adherence to the treaty because of the inadequacy of our own systems and Soviet violation of the non-interference guarantee. If we cannot be sure that the terms will be obeyed then the Senate should refuse to ratify the treaty when Soviet violation of other major treaties is so obvious.

Former Secretary of Defense Melvin Laird, writing in Reader's Digest ("Arms Control: The Russians Are Cheating!") in December 1977 demonstrated that the Soviets have clearly violated the first SALT Treaty. These infractions include:

(1) They have tested a radar for use with an anti-ballistic missile (AMB) system which the treaty clearly prohibited.

(2) The SALT Pact clearly forbade any work on and deployment of ABM mobile components. However, the Russians have tested movable AMB radar.

(3) The mobile SS-16 ICBM, discussed in an earlier part of this series, were moved from factories at night and camouflaged in wooded areas. This elaborate concealment is open interference with our "national technical means" of verification in violation of the treaties.

(4) In testing of the SS-20 IRBM, the Soviets further defied the above provision. When Soviets conduct tests of their missiles we can receive and study the telemetry (radio signals from the missile to ground stations which provide information on their performance and characteristics) from those tests. To prevent this and in violation of the treaty they encoded SS-20 telemetry so that we would not be able to understand it. As a note, when we

finally deciphered this telemetry we discovered that the missile had been tested with 2000 pounds of ballast which if replaced by fuel would give the SS-20 intercontinental range. The Soviets deny that it has this range.

(5) The Soviets have also tested at least five times the SAM-5 anti-aircraft missile to determine their use as ABM's clearly in violation of the SALT I treaties which "clearly forbade any testing aimed at upgrading an anti-aircraft missile system into an ABM system." (Laird).

Mr. Laird concluded, "Treaties that cannot be enforced are worse than no treaties at all. They breed a baseless sense of security and dangerous complacency." This applies just as well to the treaty being considered.

The loss of monitoring stations in Iran are a serious handicap in verifying the treaties. CIA Director Stansfield Turner in secret testimony before a Senate committee in April reportedly said it might take five years to replace the capability we lost in Iran. Such listening posts in Turkey (which the Turks say we must have the agreement of the Soviet Union before we can use) cannot fully replace those in Iran. While the stations in Iran looked straight into a prime Soviet testing range those in Turkey are hidden behind a mountain range.

Other difficulties in verification include the fact that while we may see cruise missiles in submarines we cannot tell whether their range is 375 or 1500 miles. Watching their tests is not a very reliable way to determine a missile's range either because as we saw above sometimes they deliberately test their missiles at below full-performance capabilities. It would also be hard to verify if they are MIRVing (fitting missiles with multiple warheads) their ICBM's. In addition, while satellites can photograph missile launchers they cannot usually detect hidden missiles. Satellite verification may grow more difficult in the near future due to the Soviet theft of the operational manual of our most powerful reconnaissance satellite.

Satellite analysts must direct the satellite's cameras where they think they can find something, considering the vast Soviet landmass. But in the mid-1970s, it took two

Part III There's poison in the SALT

years before our satellites detected all of the four huge radar installations, which may be the largest in the world, near the Arctic Circle. And even then only after a tip from a defector. Also, many areas such as the four main Soviet missile works—at Moscow, Gorki, Dnepropetrovsk and Bisk, are frequently hidden by thick cloud cover.

Besides these shortcomings in our means of verification, the Soviets are developing what may soon be a clear threat to our reconnaissance satellites—"killer satellites." Since 1967 they have conducted a series of 16 experiments to develop a satellite whose purpose is to destroy unwanted foreign satellites. Three years ago a U. S. early warning surveillance satellite was "blinded" and its companion message relay satellite knocked out. Some, including Major General George Keegan, who first brought these Soviet efforts to the attention of the Pentagon, believe that they were knocked out by an experimental high-powered laser beam from earth.

According to "A New Strategy for the West" (by Lt. Gen. Daniel Graham), "Killer satellites . . . are not very useful for a record-strike strategy, but they are important to a first-strike strategy and their inclusion in the Soviet strategic arsenal adds to the mounting evidence of Soviet rejection of deterrence as the primary rationale for nuclear forces."

Verification is a definite problem with this treaty as with SALT I and cannot be otherwise as long as Communist ideology views diplomatic agreements as scraps of paper to be obeyed when practical and disregarded when compliance conflicts with the strategic goal of world domination. While Communist morality which is an integral part of Marxist-Leninist belief views only that which aids in the expansion of the Community system as good no treaty upon which our survival as a nation depends should be entered into with such countries. SALT II is such a treaty.

In the next portion of this series, to be continued within a few weeks, the U. S. deterrence policy of MAD (Mutual Assured Destruction) on which we have based arms limitation proposals will be examined.

The Chanticleer, established as a student newspaper at Jacksonville State in 1934, is published each Tuesday by students of the university. VERY BORING JOB,
VERY BORING.

Letters

(Continued From Page 2)
commuter and no matter what time I get to school I can never find a parking space close to my classes. I always have to park a long way from my class and walk all day. By the end of the day I'm too tired to think about studying.

I think that spending all that money last year to paint the curbs red, for the commuters and green for dorms was a "white elephant." The paint was expensive and this year both colors are for the same student. I don't understand why some of them that are painted yellow are doing so. One that comes to mind is the curb in front of the house of the president of the university. I feel that some of these yellow curbs could be used for students' parking.

Name Withheld

++++

I have a complaint and maybe you can help. Have you ever come out of a party and your car was gone? Well, I am a freshman at JSU and it was the third night we were here. A bunch of girls and I piled in a car and went to a party. When we came out the car was gone. That is the worst feeling in the world. I know there are others at JSU that this has happened to. I don't disagree with the law or anything but they ought to leave a sign or something to

let you know where your car is at. I know you probably can't help but maybe if everyone worked maybe we could do something about this.

Lisa Hodges

★Cars parked on yellow curbs in both the city and on campus are towed away. Also, cars which block driveways or obstruct traffic are often towed off. If you come back to your car and it is gone, you should contact either the campus or city police, depending on where you were parked.

++++

I am writing you in concern of your sports section. I am a freshman and I was told that JSU had a good basketball team and that the school newspaper covered all sports. I have only seen one paragraph in your paper about the basketball team. Although you are covering other off-season sports, you are not covering basketball. I would like to see more articles on basketball.

I know that it is football season but some people are interested in other sports, too. I would like to see more article on the other varsity sports at JSU.

++++

After participating in the ordeal of registration, I believe several changes could be made. Computers should be used to ease the

strain on the students. It is a waste of the students time to stand in line and then discover that the class he wants has been closed.

The tables should be arranged alphabetically so the confused freshmen and any other first time students are able to find the tables without difficulty. Having to run wildly all over the registration room doesn't accomplish anything except frustration to the students.

Darryl Cole

Friendly Campus

Dear Ms. Moon,

I am new at JSU and so far it's been great. It takes getting used to all the new faces and teachers. The dorm life is great, considering at the girls running in and out of your room. It really gives you a chance to meet a lot of people. I really think I'm going to like JSU, but I still miss home.

Name Withheld.

★Everyone does.

++++

Dear Sir,

This is my first year at Jax State. I have been very impressed by many things at the university. One thing that stands out in my mind is the music program here. Being a drummer myself, I

have come to follow the Drum Corps and their music.

Ever since my freshman year in high school I have followed the line. Our drum line at my high school uses them as a model. I just want to thank the drummers from years past and all present for supplying me with many hours of enjoyment.

Sincerely,

Joel K. King

+ + + + +

To the Editor,

After staying on the JSU campus for a couple of weeks, there is one thing out of many that I noticed. This is the way the campus grounds are maintained. I want the people (who take care of mowing the lawns and trimming the hedges) to know that this is really appreciated. Because keeping the grounds neat is what makes the campus look so great.

Glenda Benford

++++

Dear Editor,

I am a beginning freshman at Jacksonville State University. I would like to comment to you about the extreme friendliness of everyone on campus at Jacksonville State. The familiar saying that this college is "the friendliest in the South" is certainly true.

Everyone you meet, whether it be faculty members or students, goes out of his or her way to be extremely friendly. In this

way, they show how much they care about you and want you to be as comfortable as you possibly can.

Sincerely yours,

Julie Wilson

++++

Dear Ms. Moon,

I would like to say I am really impressed by the friendly people here at JSU. I am a freshman and I was totally lost when I arrived. Nevertheless, everyone was more than willing to help me find my way around. I must say I really appreciate the friendliness. I feel right at home here now.

Sincerely,

Phyllis Boxx

+++

Dear Editor,

The thought of JSU never really struck me as being as friendly as everyone said, but after I arrived I found this to be true. Everyone is very friendly and treats one like a human being and not just another number in a crowd. JSU is my choice over any other place.

Name Withheld

++++

Dear Mrs. Moon

Since I have been attending JSU I have found it to be the friendliest campus in the South. I have found it to be true by the many respectful services, such as freshmen orientation, SGA, Greek system, and the life on campus. JSU has been proven to be the friendliest campus in the South.

Name Withheld

I would like to say that the NC grade is one of the best ideas of the university. This shows that the faculty cares what the students do. It also assures that students learn.

Sincerely,

Name Withheld

++++

I just want to say that I'm glad I chose Jax State. It has held up to the reputation of being "The Friendliest Campus in the South." The teachers all show an interest in the students and are willing to help you with any problems. The students I have met are all willing to

lend a hand even when busy with their own worries. The friendliness here on campus has helped me through these first few weeks and I hope it will always remain "The Friendliest Campus in the South."

Name Withheld

++++

Dear Sir,

I would like to compliment Mr. Bill Meehan and all of the other personnel who work with inducting late students into this fine institution of higher learning. As a late student, I figured to find counselors who could

careless if I got the subjects that I needed or not, but, instead I was met by very friendly people who set out to do everything in their power to get me what I needed, even if it meant staying after hours to try and work something out. My appreciation and gratitude is extended to Mr. Meehan and everyone responsible for getting me set up here at Jax State.

Dormitories

Dear Editor,

I am a freshman in Dixon Hall. I am very pleased with Dixon and the people who are in it. For a roommmate I have a senior who is great to room with. Nothing against my roommate, but why don't the freshmen men have a hall like the girls' freshmen hall?

Name Withheld

+++

Dear Editor,

I'm writing this letter to you to complain about conditions in dormitories. First of all, a person pays \$200 to live in an air conditioned dorm, and the damn things don't even work. Second, the toilets don't even have toilet paper. Third, the noise level late at night is unbearable. A person can't even sleep. Surely these things aren't hard to do something about. I wish the dorm directors would get off their butts.

Name Withheld

★ Now you know why apartments around here are at a premium.

++++

I would like to express my concern over the inadequacy of JSU's failing to provide ample living room for its

students. An institution as well established at JSU should be capable of offering living quarters to any one who wishes to live on campus. Jacksonville is obviously going to lose a relatively large portion of its prospective students because of the position it now finds itself in.

The administration of Jacksonville should have had the ability to foresee such a growth in attendance. There is absolutely no logical reason for their inability to see Jacksonville through this time of expansion and development.

—Mark Brock

★ At this time plans are being made to build a new female dorm and after the new Fine Arts Building is completed, Abercrombie and Pannel Halls will be remodeled into male dorms. As for the current shortage in the past, JSU has been a commuter college, with many students driving to school daily from Anniston and Gadsden. The administration could not foresee the gas crisis which stopped this commuting any more than anyone else could.

++++

Dear Ms. Moon,

I came to JSU expecting to have a little fun and a lot of work. In our dorm every one is having a lot of fun, but all I have is a lot of work. How can I do all my work while the dorm with all the hell raising going on? My roommate and I are looking for an apartment if you know where one is please let me know.

★ Honey, you're lucky you have a place to sleep. Apartments? No way!

+ + + + +

Dear Ms. Moon,

I thought I'd let you know what went on around JSU during the Labor Day weekend.

Some friends and I decided to go to the Copper Penny. I went ahead to check the place out, and about 45 minutes later, my friends came running in telling me

three football players at our door. That started a wrestling match after about two and a half hours they got the message. Then all of a sudden (noon Saturday) I was put out in the hallway bed and all and just left there until I got up. And that was one more fun filled weekend at JSU.

Name Withheld

★ Oh, the woes of dorm life

++++

Dear Editors,

I would like to have a word with those who live in dormitories. When you live in a dorm you find that people are the rudest creatures on earth. Yelling, running, playing football and basketball, turning on loud music. This all goes on in a college dorm and can be annoying to those who aren't participating in such ruthless acts. Those who are

key word. If you can't sleep in your dorm then why pay so much for a useless place?

Studying is another vital issue. How can one learn anything when there is so much noise going on? Okay, so classes have just started and everyone is a little keyed up, but there are extremes. When five girls are raising hell next door to you for nine solid hours, it gets frustrating to try and study. In my opinion studying and noise are just two non compatible things.

For those who are the rude culprits, all I can say is that you're also disrespectful, disturbing, disgusting and disliked. You should learn to behave decently when it comes to your actions affecting someone else's life. Be kind and considerate and the dormitory will be a nice place to live, sleep and

Dear Ms. Moon

Many of my friends have purchased one of the meal tickets the school has to offer. They also complain that their schedule doesn't work out where they can eat all their meals. I was wondering why a meal ticket couldn't be purchased for just the breakfast, dinner or supper meals or whichever they preferred. In a sense, they are wasting their money for meals they are not eating. Also, the cafeteria could serve longer hours and offer a larger variety.

Name Withheld

★ SGA offers different meal plans with the smallest one being two meals in five days. If you can't make a certain meal due to classes, go see

No more red M&M's

By CHUCK AVERY

While in my English 302 class, a young man lit a stick of incense and put it behind his ear like you would a pencil. The whole room smelled of jasmine but as the class ended, I wondered if he would remember to put it out before he burned himself.

++++

In passing a teacher, I saw her yawn. I casually commented that she should wake up. In reply she said, "It's terrible when your own lectures put you to sleep'."

++++

This past weekend, a friend from Georgia visited me. Forgetting about the time difference, he set all of my clocks by his watch without telling me. When I got to class on Monday morning, I thought something was wrong when the parking lots were empty.

Then the radio D.J. announced it was only 6:30 and I knew then what had happened.

++++

While walking by the amphitheatre last Sunday, I heard a motor running so I decided to investigate. The answer to my investigation led me to another question. Why would the university leave the air conditioner on in a building they only use once a year?

++++

It has been a year since I felt the way I did today. Fall is almost upon us and with the fall comes the excitement of colored leaves, cooler days and football. Jacksonville is a nice place to be this time of the year.

++++

There are no more RED M&M's.

Total lunar eclipse seen from JSU's observatory

By JOHN P. BEALE

On Thursday morning, Sept. 6, 1979, a total lunar eclipse highlighted the pre-dawn sky for those few who were willing to endure the early morning hours to catch sight of this celestial wonder. The entire United States as well as other parts of the world were able to see at least a partially eclipsed moon. The continental United States as well as Hawaii was able to observe totality in a completely dark sky, except for the extreme northeast which was overtaken by sunrise before totality could be completed.

To set the record straight, let us first decide just what a lunar eclipse is. In order to fully understand why a lunar eclipse can take place, we must first recognize that the moon shines by reflected light from the sun only. Every month the moon takes on different shapes, called "phases." This is due to the position of the earth in between the moon and the sun. The more sunlight that is blocked by the earth means that there is less sunlight reaching the moon. During a full moon there is no light being blocked by the earth. During a new moon, the moon is completely hidden in the earth's shadow. During a total lunar eclipse, the earth is in a position to throw its shadow, caused by the sun, across the moon completely in a matter of three or four hours. Here in Jacksonville, Alabama, the very outer portion of the earth's shadow, known as the "penumbra", struck the moon at about 3:30 a.m. local time and proceeded to darken the very bright full moon and turn it pale orange color. As the eclipse progressed, the entire moon was noticeably dimmer and then the dark inner portion of the earth's shadow known as the "Umbra" began to cross the moon's surface. This portion of the eclipse began about 4:18 a.m. local time. During this portion of the eclipse the moon began to disappear completely from sight. As the observer watched, more and more of the moon began to vanish from sight until about 5:31 a.m. when the moon became totally eclipsed. Although observation of the moon emerging from the earth's shadow was seen in the mid-western states and California, sunrise overtook us here at Jacksonville before we could catch it. Although people might think that a lunar eclipse is a rare occurrence they are wrong. A lunar eclipse occurs every six months minus twenty-two days. The next lunar eclipse visible here at Jacksonville, or anywhere in the United States is March 15, 1980. This one will be visible around midnight, so everyone interested needs to try to catch it.

The wonders of the lunars is one of the many great things that God has given us to enjoy. Let us all be more aware of the happenings in the universe around us and more thankful to our Lord for his greatness and love for us all.

See phase one on page one.

Jacksonville State University

**Cash in
your cans.**

Last year Jacksonville State University was the number one school in all of the southeast in the recycling of aluminum cans. At the same time J.S.U. finished ninth of all schools in the entire nation. These noteworthy accomplishments came about through "The Really Great Pick-em-up Contest" sponsored by the Miller Brewing Co. and Quality Beverage Co.

Miller Brewing Co. is the national leader in the effort to recycle aluminum cans. Miller, along with Quality Beverage Co., is also the leader in recycling on the J. S.U. campus.

This year in addition to the great prizes given away in "The Really Great Pick-em-up Contest", Quality Beverage will pay 25¢ per pound for any and all types of aluminum cans.

At your Miller Reclamation Center.

So pitch in and help keep our city clean and turn your cans into cash.

For more information, contact Bill Harris at 435-9860 or Jim Bohanon at 435-3962.

WLJS - 92 still going strong

By CHUCK McCARTY

In the fall of 1975 there was a first at Jacksonville State University. That is, an on-campus student radio station started broadcasting on a regular basis. That station, WLJS-92 FM, is still going strong, cranking out great vibrations to Jacksonville and surrounding areas. From within the basement studios in Bibb Graves Hall, to the antenna atop Houston Cole Library comes the sound that keeps JSU in beat with today's world.

The format of WLJS is pretty simple yet highly entertaining. Rock n'roll and top 40 songs are featured along with some old gold tunes from days past. At night as much as 4 minutes per hour is devoted to rock. Also included are latest hits and albums that are popular locally.

92-J also boasts of commercial free listening, quite different from most area stations. A popular part of the format includes a request line. The 92-J request line is always open at 435-5463 or 43J-LINE as the DJs have dubbed it. Students can call and request their favorite tunes as well as the format music.

Like every good radio station, WLJS has an excellent administrative staff. John Selman, a junior, is the new station manager. He has introduced new promotions and ideas such as a news correspondent to the SGA. John is a good leader and keeps the station running smoothly.

Among other executive personnel is Leo Davis, a senior, who is the program director and Randy O'Donnell, production manager, who is also a senior. In the news department there is Art Turner, senior, news director, who does a great job of coordinating the world, national, state and local news. His round-up of all top news at 5:45 has all the latest scoop from stories the United Press International (UPI) line. Art also has a very efficient news staff (including this writer) who are always on hand to bring newscasts, ten minutes before every hour. John Selman is very pleased with Art and the news staff. Another senior, Steve Godbey, is the station's music director who keeps the audience in tune with the latest hits. The faculty advisor, Mr. John Turner, is always helpful in maintaining the efficiency of the station.

WLJS offers many benefits to the student at JSU. The music, news, and announcements are just a few of the services that your radio station provides. From Big John's early morning shows Monday, Wednesday and Fridays to help wake those sleepy students to Johnny Self's dynamite Tuesday and Thursday early shows, WLJS has something for everyone. There is even a classical music show from 12 to 3 followed by a jazz

'Nutshell' photo award recently given to two graduates

A recent graduate of Wright State University in Dayton, OH, and a graduate student at Temple University in Philadelphia have won first place awards in the student competition of the Sixth Annual Nikon-Nutshell Photo Contest. A professor at the College of St. Rose in Albany, NY has won

Cynthia Bornhorst, who majored in fine arts while attending Wright State University, placed first in the contest's black and white category. Edward Fiorini, a graduate student in education at Temple University, took top honors in the color category. Martin Benjamin, who has taught

years, won in the faculty competition. As first place winners in the national contest, each receives \$1,500 in Nikon photographic equipment.

In all, 199 prizes totaling \$13,250 were awarded in the contest sponsored jointly by Nikon, Inc., and Nutshell magazine.

won third prize.

Faculty runners-up were Steven Hirsch, New School for Social Research, New York, NY, who placed second; and Thomas Gutekunst, Cedar Crest College, Allenton, PA, who was awarded third prize.

Second place winners receive \$1,000 in Nikon

Book review 'Fraternity Row'

By CHUCK McCARTY

Fraternity Row is an explosive yet emotional look at Greek life in the early 50s. It vividly displays the social and personal life of members (actives) and pledges (freshmen) of a popular frat on a fictitious campus. From the relationship of the brothers to the link between them and a sister sorority, this flick shows the adjustment and conformity one must suffer through to be socially accepted into a frat.

Peter Fox gives a good but

not startling performance as Rodger the new pledge master of Gamma Nu Pi. He is the hero who is in conflict throughout the film because he wants the age old ritual of fraternity hazing stopped or at least moderated to a level of decency.

Chunk, played by Scott Newman, is Rodger's antagonist who wants to take his bad memories of hazing out on the new pledge class. This tends to pit him and Rodger head-on in a fight

(See REVIEW, Page 9)

From the pitts

By LISHA BROWN

As you sit in class listening attentively to your professor, do you ever wonder about that person sitting in front of you or beside you? Do you ever ask of yourself the classic questions: Why can't I be relaxed and with it like that person over there? Why do I always have to be the one with all the crap to do and responsibilities? Why?? I just want to know why!!

If you've experienced these feelings I'm sure you later realized how unnecessary and foolish they are. You probably counted your blessings to make yourself feel better... "Uh, well, I've got two legs, strong teeth, a face, (that's all I can say for it). I'm only about 40 pounds overweight, and I eat at least two meals a day so I'm better off than all the starving children in deprived foreign countries.

What next? You proceed to the next step. You cease to care. You take the "I feel the PITTS and I don't care who knows it" attitude.

went wrong, you ripped your clothes and pulled your hair and gnashed your teeth and walked around town. Nobody bothered you. They'd see you bound around the corner and they would refrain from asking questions like, "What's wrong?" I would be apparent that you felt the pitts and wanted society to leave you alone!!! Then there could be a law stating that anyone disturbing a person in the "pitts" state would be prosecuted.

Of course we all know that the best way to handle things when you're in the pitts is to get out. Think about something funny or laugh at the stupidity of your situation even though it's not really stupid. "Here I am sitting in a Psychology class feeling like crud city! Ha Ha Ha Ha Ha!!!"

Then your professor proclaims you a neurotic hysteric schizotypic with a "wandering liver" or something.

In conclusion, I just want

classical music show from 12 to 3 followed by a jazz after all, it's your station! Keep tuned to 92-JFM.

Rose in Albany, NY has won top honors in the faculty contest.

Benjamin, who has taught photography at the College of St. Rose for the past seven

magazine. Runners-up in the color category were Margaret E. Wingfield, New York University, who placed second; and Dick L. Van Halsema Jr., University of Missouri at Columbia, who placed third. In the black and white category, Ed Kashi, Syracuse (NY) University, placed second; and Peter Haley, University of California at Berkeley, receive \$1,000 in Nikon equipment and third place winners receive \$750 in equipment. In addition, 15 fourth prizes, 25 fifth prizes and 50 honorable mentions were awarded in each category to student photographers. Ten honorable mentions were awarded to faculty members. Nikon, Inc., is a subsidiary of Ehrenreich Photo-Optical Industries, Inc., Garden City, New York. Nutshell is published by 13-30 Corporation, Knoxville, Tennessee, a ten-year-old firm specializing in marketing programs and educational publications for the young adult age group. 13-30 Corporation also publishes several business magazines.

to say one thing, "I feel the PITTS and I don't care who knows it! Gnash Gnash Gnash..." Wouldn't it be nice if we could bring back ancient traditions? If something

supper cooked" I thought. I returned that evening to find my obviously disappointed roommate sitting on the couch. "What went wrong?" I asked. "Well, she came in and we took up a normal conversation. Everything was going really great. Then she glanced over at our dirty dishes on the counter. She jumped up and ran over

there and started looking down between the plates, and she got real excited. "Why?" I asked. "She was a zoology major. She said there was a weird strain of fungus growing on our dirty dishes. Then she grabbed one of the plates, said she just had to have it for class tomorrow, jumped in her VW and drove off without even saying goodbye."

Book review

(WANGERIN, Walter. The book of the dun cow. Harper & Row, 1978. 241p 77-25641. 6.95 ISBN 0-06-026346-6. C.I.P.)

A rare and strange animal fable, which is moral, yet not moralistic; fantastic, yet truthful. The plot focuses on Chanticleer, a rather likeable anti-hero, who rallies the animals—most of them as full of foibles as their leader—to do battle first against Cockatrice, a despicable rival (partly rooster, partly serpent), and then against the source of evil, Wyrms, who with his armies of basilisks almost succeeds in escaping his prison underworld and destroying creation. It is not Chanticleer, however, who saves the world but rather a woe-begone "rug" of a dog, Mundo Cani, who dies in a moving climax of terror and sacrifice. But if there is a religious allegory, it is never obtrusive. The characterizations are powerful, even unforgettable. The plot—especially the stark battle scenes—has momentum almost beyond belief. The original Book of the dun cow—Irish legends which were said to have been recited by Fergus Mac Roich (who rose from the dead to recite them) to St. Ciaran of Clonmacnoise (who wrote them on the hide of a dun cow)—could hardly surpass this 20th century namesake. Its style, plot, theme, but above all, its characterizations will surely place this Dun cow among the classics.

THE ABC'S OF FUEL ECONOMY

Here are some easy tips to help you get more miles for your gasoline dollar. Use them all and you can save as much as 4¢ on every gallon!

To get a free booklet with more easy energy-saving tips, write "Energy," Box 62, Oak Ridge, TN 37830.

ANTICIPATE... stops, turns, lights, traffic, hills.

BUFFER... yourself from other traffic; leave room to react.

CONSERVE... momentum by avoiding unnecessary braking, turning, accelerating.

ENERGY.

We can't afford to waste it.

U.S. Department of Energy

'Guys & Dolls' - Catch it

By LISHA BROWN
I dropped by Self Cafeteria to see how rehearsal for the drama department's upcoming production of "Guys and Dolls" was coming along. I saw a roomfull of very talented young people engaged in some heavy rehearsal. They weren't

fooling around! Dr. Wayne Claeren, the director of "Guys and Dolls", had come complementary remarks concerning his cast. He said that the cast was large and good, good singers and actors. The play is set in New York in the 1950's, which

gives it a certain nostalgic quality. It's a comedy with good music. The play will be accompanied with a full orchestra. Production dates for "Guys and Dolls" are October 9th - 13th, curtain time is 8:00 in Self Cafeteria.

Guess Who
this week
is
Dr. Greene Taylor,
Dean of Education
at JSU.

Next week's flicks

A STAR IS BORN
One of the most entertaining movies of the 1970s. Barbara Streisand and Kris Kristofferson star in this sensitive, realistic look at fame and fortune and changes in man-woman

relationships. They play two rock stars—one up and coming, the other going down fast. It's a beautiful love story enhanced by the Grammy Award winning music composed by Barbara Streisand and Paul

Williams. The film contains several concert scenes. **OH, GOD!** God comes down to earth in the form of a snappy old George Burns in this box office smash. John Denver

portrays a supermarket-manager chosen by God to assist in straightening out mankind. This movie offers great performances by Burns and Denver whomakes a delightfully funny comedy team.

'An Evening of Jazz' concert coming to JSU

By LISHA BROWN

Tuesday night, Sept. 25, at 7:30, the Mason Hall Performance Center will stage "An Evening of Jazz." Featuring Dr. Ron Surace and the JSU Jazz Quartet and the friends of Jazz.

On the friends of jazz, Dr. Clyde Cox, will be performing some of his original works, singing original compositions and playing piano. The arrangements will include the JSU Jazz Ensemble.

Dr. Cox played in big jazz bands in New York as a trombonist before he began his career in English. According to Dr. Ron Surace, Dr. Cox has tremendous expertise in the history of jazz in the Southeast from 1900 to the present.

Also featured will be Myrtice Fields singing gospel and

jazz selections. When she toured with the Jazz Ensemble in Europe, she brought the house down with superb singing voice and audience appeal. Myrtice Fields has made numerous appearance on television and radio. She now directs the voice of Anniston, a fantastic gospel choir.

The Jazz Quartet, consisting of Dr. Ron Surace at the keyboard, Rayvan Dur, Tommy Krammer and Chris Daglis, will perform original works composed and arranged by Dr. Surace along with jazz standards. The quartet, all music majors, toured Europe with the ensemble this summer and played on radio and television with Dr. Surace.

There will be no admission to the concert and it is open to the public for their enjoyment.

JSU's art major holds public exhibit

By N. KARLOVICH-SMITH

Ms. Andrea Gardner, JSU junior and art major, held her first public exhibit at Hoke's Bluff first annual arts and crafts show Sunday, Sept. 9, from 10 a.m.-5 p.m. The event, sponsored by the Lions Club of Hoke's Bluff, drew a crowd of over 500 people and featured over 50 exhibits.

Ms. Gardner, who showed her work in batik, oil, charcoal, and pastel, said that she felt public response to her work was good.

The majority of her work included geometric, color-emphatic, designs done in batik (art technique dealing with hot wax and dye). Two favorites according to crowd opinion seemed to be an oil done with a palette knife picturing a forest paradise and a charcoal of a tigress and her cub.

Andrea, a fanatic on art history and Egyptian art, also enjoys working in pottery. Her hobbies include listening to bluegrass and jogging. She intends to work with an air-brush on scenery mural in the near future.

"I wanted to show batiks because no one really shows the medium in this part of Alabama," said Ms. Gardner,

who first became interested in batik in O. Holmes Design II class.

When asked what she'd like to do career-wise after graduation, she stated, "I'd like to be a professional commercial artist, probably an illustrator. I've already drawn a lot of cartoons. My favorite is Charles Schultz."

Mr. Andy Gardner, Andrea's father and "number one supporter," said, "Andrea puts a lot of time in her work. She puts it before her social life. We have a good response to her work today and look forward to bigger and better shows."

A local Hoke's Bluff High School teacher, Mr. Murray Millander, spoke highly of Andrea and her work.

"Andrea is an up and coming young artist, probably one of the better 'starving' artists in the area. I'm impressed with the colors and with the patience I see in the art work. That quality is not common in a girl as young as she is," said Millander.

The Chanticleer staff wishes you good luck on your future exhibits, Andrea!

Doors are open to a new field for women

By ALLEN CLARK

I'm sure everybody and their brothers have been reading and hearing about the problems that women reporters have been having when they try to get into the locker rooms for interviews. Well, Jax State has three women who do have access to the place that, until now, was closed to the feminine gender.

Yvette Spillman (Kennesaw, Ga.), Sherry Craig (Fort Payne) and Vicki Jones (Calhoun, Ga.) are now official athletic trainers here at Jax State. Yes, that's right. I said that these three women are trainers for the JSU football team.

What are the women's outlook on this new career?

"I really like it," was Sherry Craig's comment. "I think we're setting an example for women. I started out in Nursing but then I decided to change my major to P. E. This is a wide open field for women, and you can be pretty positive that you'll have a job when you finish school."

It wasn't an altogether new thing for Sherry to step into sports. Sherry's dad played football as well as her brother, and her mother played basketball in school.

"People kid me a lot about it," Sherry added. "But they're just kidding around. Everybody is real nice to us here. It seems like we just fit right in with the program."

Yvette has also been around sports for quite a while. She not only participated in high school sports, she's on the women's track team here at the college as well. Yvette is planning on making a career as a college athletic trainer and she's collecting all the experience she can get.

"I like what I'm doing. It's what I want to go in to," Yvette commented on her new job. "The only hard part was the first three or four days and it was kind of awkward getting used to it. Now it's like being one of the guys."

Being a trainer is nothing new to Vicki Jones. Vicki did the same thing at her high school.

"Over there the people are used to it," Vicki said. "Over here it's something new and everybody makes a big deal out of it. The difference though is that when it first started over there people smarted off about it, but over here everybody thinks it's great."

Jax State puts the hammer down for 3 minutes to win

By ALLEN CLARK

It was the young and tough Red Bandit defense that saved the day last Saturday against Alabama A&M. The defense scored two touchdowns and held off a last minute scoring drive by A&M to win the game, 28-21.

The scoring looked pretty even, but after looking at the stats, it was obvious that the Gamecocks sorely needed those "big plays" by the defense to keep in the game. In the rushing category Jax State gathered in 106 yards compared to 197 yards for A&M. In what is normally JSU's top area (passing), the Gamecocks picked up only 130 yards while A&M piled up 288 yards.

Also, something to note in game was the number of penalties. A&M nullified over a third of their yardage with a total of 185 yards worth of penalties, while Jax State had a total of 92 yards of penalties.

"I think it was obvious that our defense won this game," said head coach Jim Fuller. "With the blocked punt, the interception and the goal line stand we had some young people grow up considerably out there."

The Gamecocks had three of the wildest three minutes possible as the first half was drawing to a close, and the second half barely started.

ball moving in the last quarter and had to punt the ball to A&M.

The Bulldogs, on their last possession, drove the ball 78 yards to what looked like the tying score, but when the Bulldogs were within two yards of the goal line, the Red Bandits were seeing red and would not give up. They held the 'Dogs four downs and on the last down, the A&M offense were caught taking too much time and the ball was moved back to the seven yard line.

With fourth down and seven yards to go, linebacker Eddie Garfinkle was the instant hero of the game after he slapped away Austin's last chance pass to save the win for JSU.

"We were all thinking pass on the play," Garfinkle said after the big play. "I know I was thinking of my zone. As soon as I saw Austin drop back I started looking for a man, any man. I found one, too. But the important thing though, is that I got to him before the ball did."

"This is just a big, big win for the team," Garfinkle added. "It was a game we had to have."

Coach Jim Fuller was definitely pleased with the win that evened up Jax State's record at 1-1.

"This was just a tremendous win for us," Fuller said. "It was a game

last week's loss to Mississippi College. I thought our defense came through with several big plays. Our offense moved the ball at times, especially when we had to have it."

The win didn't help the team's conference record (A&M is not a GSC team), but it did warm them up for the next game against conference foe, UT-Martin next Saturday (Sept. 22). The game starts at 7:30 here at Paul Snow Stadium.

Game Statistics

Jax State (28)		Ala. A&M (21)

92	Yards penalized	185

Janice Pace, the new volleyball coach, picked up an easy win in her debut. The Ladies swept three straight over Stillman College Thursday, 15-4, 15-13, 15-8. Nice start Janice.

The JSU wrestling team started official practice Monday. Coach Mike Craft noted that anybody still interested in trying out should contact him immediately at the

Sherry Vicki

Some of you are going to say some silly things about it and some of you might even be a little shocked, but I say it's fantastic. These three ladies are opening up some doors for themselves but most importantly, they're opening the door to a whole new field for women in the athletic program. Jim Skidmore, JSU's athletic trainer-coach, is more than glad that he came up with the brainstorm idea last year.

"I was more anxious than anybody to see it work out because it was my idea and if it didn't work out I'd catch it," Skidmore said. "But it's worked out just fine."

Skidmore, who seldom had a minute to himself and his family last year, is putting these ladies to work to prepare them for the coming fall and winter sports.

"The athletic program has grown so much in the last five years, that I need more people to help me cover all the areas," Skidmore said. "These women are enthusiastic and willing to learn everything. They're learning to be responsible and that's going to take a lot of weight off my shoulders. It's great to see their spirit. One of them is always right there watching and trying to learn."

Jim Skidmore is glad that the women are in the training room for more than just treatment for cuts and bruises. With them in the area, everybody is conscious of their language and behavior, and they just might be making some gentlemen out of some of the players.

Skidmore is hoping on a long range program and not just a short lived fad.

"My plan is to give the women the same opportunity as the men have in this field. My women are going to be alright. They're going to do the job and get it done. It's just going to be a big challenge for them," Skidmore added.

Yvette with "the guys"

What does Jim Fuller think about it all?

"Well, if these girls are willing to work and do the job, then great. They're a part of the team," Fuller said. "It was a little bit of an adjustment getting used to them in the locker room, but they look like they know what they're doing. Oh, and they are a lot prettier than the rest of the trainers. Shoot, my two little girls at home think it's neat."

What do the players think about the women?

Eddie Garfinkle: "I like 'em. It was hard to keep my mind on football in the beginning but now it's like they're not even out there. One thing that is great with them is that they're so delicate when you get hurt. Now I like that."

Greg Robinson: "I like it a lot. I think it's alright. You know it's nice when you come off the practice field after a hard work out and they're always there with a pretty smile."

second nair barely started. The A&M Bulldogs were the first to score in the second quarter after a scoreless first quarter, but the Gamecocks came back two minutes later with a Mike Watts' TD pass to sophomore Derrick Whitely. Rocky Riddle kicked the PAT.

The Red Bandits backed the Bulldogs up almost to the goal line on their next possession of the ball and Rod Green came up with the next big play when he blocked the A&M punt and fell on it in the end zone to make the score 13-7. Riddle kicked the PAT home to make it 14-7.

Only 20 seconds later, Dwayne Parker picked off an A&M pass and quick-stepped it 42 yards to the end zone for the score. Riddle was good again for the PAT and the halftime score stood at 21-7.

With only a little over a minute and a half into the third quarter, Watts teamed up with Whitely again on a 65 yard pass play to put the score at 28-7 after the PAT by Riddle.

It looked like the 'Cocks were going to run away with the game, but the Bulldogs were not to be denied the chance of a win.

Cleveland Austin, the Bulldog quarterback, started piling up yardage in the air and came up with two quick scores. The first TD pass went Frank Williams from nine yards out. That put the score at 28-14.

The Gamecock attack was shut down and on A&M's next possession, the Bulldogs quarterback connected with Roy Dean and he took the ball in for the score. The pass combo was good for 47 yards.

With the score at 28-21, the Gamecocks couldn't get the

Fuller said. "It was a game we needed, especially after

Gamecocks pick up four top spots in GSC stats

BIRMINGHAM -- Mississippi College's Calvin Howard takes the early lead in two offensive categories in the first Gulf South Conference football statistics released this week through the office of Commissioner Jim McCullough.

Howard picked up 178 yards rushing in his first outing of the season to give him the early lead in rushing offense in the conference. He also leads the GSC in total offense. Tailback, Lawson Fletcher of UNA accumulated 208 yards on the ground Saturday leading

UNA to its win over Division I School, Middle Tennessee, but it was good for only second place in the conference rushing stats since UNA has already played 2 games.

Ten players are log-jammed atop the leading scorers' statistics representing 7 different schools.

While Jacksonville State quarterback, Mike Watts, surfaced as the first week's leading passer, 2 Delta State quarterbacks, Tony Bowen and Steve Reich, are ranked in the top three of the GSC

leading passers. Des Ball of Delta State, who handled 6 passes for 83 yards and one score, is the GSC's leading receiver.

Jacksonville State's Greg Lowery, who averaged 41.2 yards per kick, leads the GSC in punting, while Emmanuel Young of UNA leads in punt returns with a fine 12.2 average per return. A. W. Clark also of Jacksonville State leads in kickoff returns with a 27.7 average followed closely by Mike Ray of UT-Martin with a 24.7 average.

In the team statistics,

UNA paces the GSC in total offense (404.0), total defense (193.0), rushing defense (92.5), and scoring offense (24.0). Mississippi College is the top rushing team averaging 344 yards per game and Delta State is the team passing leader with a 227.0 yards per game.

Jacksonville State is tops against the pass giving up a paltry 28.0 yards per game. Troy State and Mississippi College are tied for top honors in scoring defense, giving up 7.0 points in their opening games.

First hand view of the Bama game

The 12 Gamecock Seniors

By JOE BRYAN

Alabama continued its dominance of the South as the Tide rolled over Georgia Tech in the nationally televised season opener 30-6. Bama was led by quarterback Steedman Shealy who rushed for 79 yards, including one touchdown, and passed for an additional 108 yards. Next to Shealy were fullback Steve Whitman and halfback Major Ogilvie who rushed for 63 and 59 yards respectively. All-American split end candidate Keith Pugh led the receiving corps with 54 yards on four receptions.

However, it was the defense that shut down the much-heralded passing of sophomore quarterback Mike Kelly, limiting him to 160 yards and one touchdown, most of which came in the second half against Bama's prevent defense, and which included four Bama interceptions.

At first the game appeared to be the close match the opposing coaches predicted. The Tech defense successfully thwarted the initial Alabama drives, the latter by an interception at the two. They coupled with an 80 yard quick kick by Kelly seemed to swing the momentum to the Jackets. However, on the subsequent offensive play for Tech, E. J. Junior picked off a Kelly pass and scrambled 59 yards for a touchdown to enable the Tide to draw first blood. The conversion failed and Bama led 6-0 with 1:11 remaining in the first quarter. Major Ogilvie later plunged over

from the 1 in the waning seconds of the first half to give Bama a 12-0 halftime lead.

Alabama's size and depth became more apparent as the Tide rolled up 18 more points in the second half on a 13 yard touchdown run by Steve Whitman, Shealy's 11 yard touchdown scamper and 31 yard field goal by Alan McElroy. Bama probably should have scored more as the offense seemed to move the ball at will in the second half, yet a spirited Tech defense led by Al Richardson, the ABC defensive player of the game, and Henry Johnson, refused to yield in critical situations. By this time, however, the Jackets were playing more for pride than hope.

If there were to be any happiness for the Tech section of the 57,000 plus, it would have come in the final minutes of the game when, after two major penalties, an interception and a fumble, Leon Chadwick outwrestled free safety Jim Bob Harris for a 36 yard touchdown pass from Kelly.

Perhaps the game could be best summed up by a Tech fan wandering outside of Grant Field who was overheard to say, "... but Tech dominated those last 12 seconds ..."

Both teams will now have a week lay-off to prepare for their next contest. Bama will host Baylor, while Tech travels to Florida to meet the Gators of New Coach Charlie Pell.

These 12 Gamecocks represent Jacksonville State's senior class on the 1979 squad this year. From left, kneeling, Ray Brock, Rocky Riddle, Jerome Coleman, Dwayne Parker, Rod Green, and Blane Tidwell. Standing from left, Eddie Garfinkle, Joe Henderson, Mark Huskey, Mike Watts, Greg Robinson and James Moreen. Shown with the seniors is head coach Jim Fuller

together. Being bureaucrats they also managed, with their typical inefficiency, to ban certain products and leave on the market items that are much more harmful, such as cyclamates (banned) and saccharin (more harmful, but still on the market). Of course, one would have to drink a case of diet soda a day for a year to suffer any ill effects from either one. If you drink too much water it will make you sick, and with the FDA it is just a matter of time before they get to H two O.

Second on the list are all those various groups who seem to want to make it their business to keep the rest of us healthy. It was political pressure from these groups that caused most of the bans by the FDA. Remember DDT, awful stuff right? Now, these groups are claiming that the pesticides that have replaced DDT are more dangerous than DDT itself. Well, that I do believe. Any poison is going to be dangerous. It wouldn't be a poison if it wasn't.

So all these groups want to ban all pesticides and herbicides. See, they say that all these chemicals could cause millions of cases of cancer and birth defects a generation from now. The fact they ignore is that without the poisons millions will starve right now. America's five million

farmers can't feed three-fourths the world's population without chemicals.

These are also pretty much the same people who are responsible for the seatbelts and all the little buzzers in your car. In 1981, that car will have airbags thanks to these folks. It doesn't matter that research still hasn't shown airbags to be anymore effective than seatbelts or shoulder harnesses, they will still be there. They will also cost you several hundred bucks extra per car. It doesn't even matter if you don't want them, just like a motorcycle helmet, you'll have to have them.

One time, quite a while back, there was in this country a thing called personal freedom. You could back then, believe it or not, do anything you pleased as long as you endangered or disturbed no one else. If you wanted to try to dive off a bluff, that was your business and your life. Heck, you could even smoke a cigarette without first being warned by the surgeon general. Unfortunately, those days are gone. Those of us who happen to enjoy fine pipe tobacco and good liquor no longer may enjoy our pleasures in peace. In fact the way things are going, we may not be able to enjoy them at all.

Review

(Continued From Page 6)

over tradition which in the end neither one wins and a pledge loses - fatally!

Fraternity Row is a good wholesome movie for the college crowd to identify

with. It shows the closeness and brotherhood of frats as well as the social snobbery and senseless rituals (such as hazing) that was the cause of Zac's death in the

end. This particular scene is symbolic of the disappearance of hazing from some campuses over the years. Emotionally stirring

and provocative in its portrayal of characters, Fraternity Row is a milestone in films (even this writer felt a lump in his throat when Zac died).

Margaret Pope's rundown on the women's tennis team

Players Returning:

No. 1 Michelle Bland, Panama City, Fla. senior, good consistent player, lots of experience; having a very good fall practice.

No. 2 Aileen Finley-Huntsville, Al. Junior, good steady player. Won No. 2 doubles in state last year with Dianne Stewart.

No. 3 Dianne Stewart-Homewood, Al. Sophomore, very good player with a lot of power; has unlimited potential. Won No. 3 singles in state and No. 2 doubles with Aileen Finley.

No. 4 Schuyler Patterson-Marietta, Ga. Junior, steady player who has played a lot of tennis this past summer, very determined and consistent. She and Lorie Howell won No. 3 doubles in state competition.

No. 5 Vanessa Churchwell-Panama City, Fla., used up eligibility.

No. 6 Lorie Howell-Centre, Al. Was undefeated in regular state competition. Lost her only match in state tournament, was runner-up in AIAAW COMPETITION. Lorie is a very consistent and steady player. She did well in AIAW Region III competition.

New Players

Jennifer Gold, Palm Beach, Fla. A junior college transfer from Palm Beach Junior College. Jennifer should prove to be an asset to the team. She is looking good

during fall practice.

Susan Burleson, Decatur, Al. A junior college transfer from Calhoun Community Junior College. Susan is a very hard worker. She comes highly recommended from Calhoun and will make a definite contribution to the team.

Muffin Clark, Marietta, Ga. A freshman who played No. 1 at Marietta High School. Muffin is a steady player who works hard.

Mindi Carver, Rome, Ga. A sophomore who is transferring from Shorter College. Mindi played No. 1 on the State College team. She is a very strong player who is having a very good fall season.

Theresa Turner, Bessemer, Al. A sophomore who works very hard and has a lot of natural ability.

A

The team is in the process of playing inter-team competition for position. They have been working hard and the competition is very good.

There will be matches on the following dates:

Sept. 26-University of Ala. Huntsville-There-1:00

October 16-Jeff State-There-2:00

October 23-Un. of Ala. Huntsville-Here-1:00

October 26-University of Montevallo-There-1:00

Nov. 1-University of Montevallo-Here-1:30

JSU volleyball team expected best ever in '79

We have a young team that has much potential. With the experience of last year's group and the added height our freshmen have brought, we should have the best women's volleyball team ever at Jacksonville State.

We have not completely gelled yet, but the girls are working hard in practice and we expect to be ready for Stillman on Thursday, Sept. 13. We are running a 5-1 offense which is unfamiliar to many of our players, but they are catching on extremely quick and show a lot of power in the spiking department. On the whole, we're fairly small, but we are very determined. The toughest competition we will face will be the U. of Alabama, but everyone we play will be improved from

last year and we will have a fight on our hands. The team last year had an excellent record, but we hope to improve on it this year.

Returning: Karen Hester, senior, Anniston, 5' 3"; Nan Jones, sophomore, Six Mile, 5' 7"; Jan Nicotra, sophomore, Marietta, Ga., 5' 5"; Ana Recurt, sophomore, San Juan Puerto Rico, 5' 3"; Tammy Snider, sophomore, Anniston, 5' 9".

New: Debbie Seales, freshman, 5' 11"; Cassie O'Hearne, freshman, Winter Park, Fla., 5' 10"; Carol Johnson, freshman, Anniston, 5' 5"; Stephanie Kirkman, freshman, Akron, Ohio, 5' 3"; Kim Hester, senior, Gadsden, 5' 6".

10-SPEED SPORT MODEL SHOWN
STUDENT DISCOUNT WITH AD
These youthfully styled Collegiate Sport models are the ideal choice for boys, girls, or anyone who wants a sturdy 26-inch wheel light-weight style bike with dependable 26"x1 1/4" gumwall tires and easy-shifting, jam resistant 5- or 10-speed gears. Equipped with Shimano FF front freewheeling chainwheel, the derailleur system is protected from damage from back pedaling. Shifting gears is easier, especially for 10-speed beginners. Now everyone can join the fun of riding 5- and 10-speed bikes with these smooth-shifting, long-lasting, trouble-free Schwinn Quality-Built Collegiates — an outstanding value at a budget price. Available in 3-speed and Coaster brake models, too.
